WHAT IS A CONNECTED HOME?

A connected smart home integrates devices, services, and applications to communicate and cooperate seamlessly. Simplify your life by controlling lighting, climate, security, and entertainment remotely. Enhance safety and security for residents with advanced monitoring and management capabilities.

SECURITY CONTROL SYSTEM

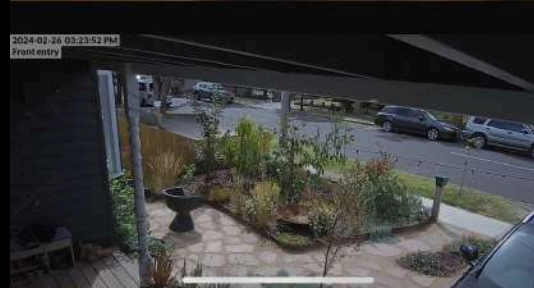

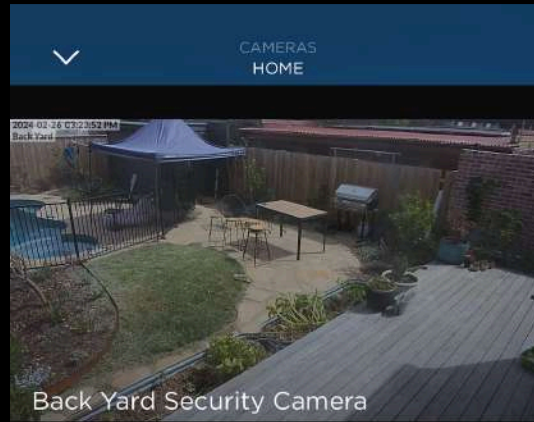

Full local and remote access to monitor, arm and disarm your system via the smart mobile app or a central touch screen panel.

CCTV

Full local and remote access via the smart mobile app or a central touch screen panel to;

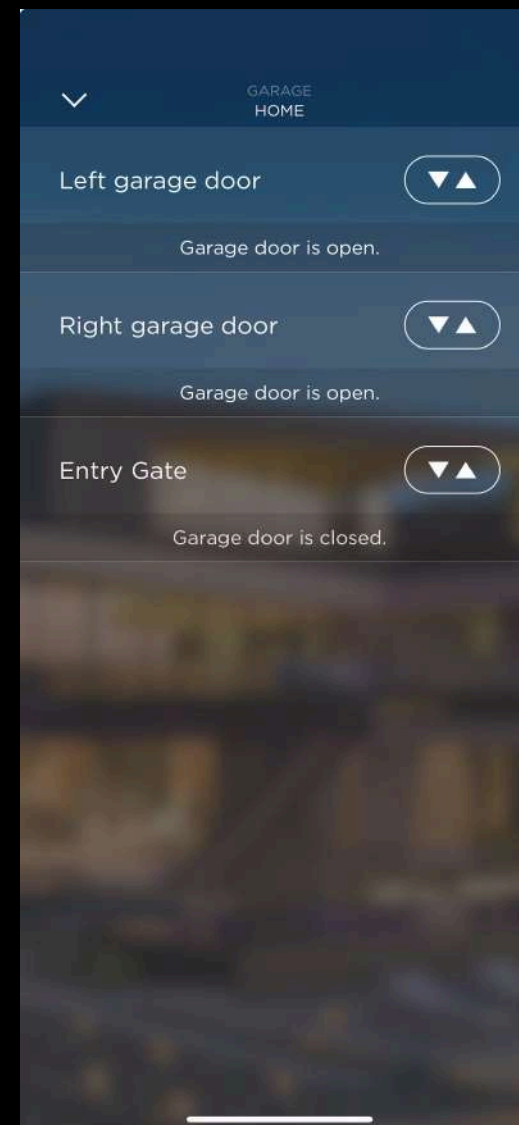

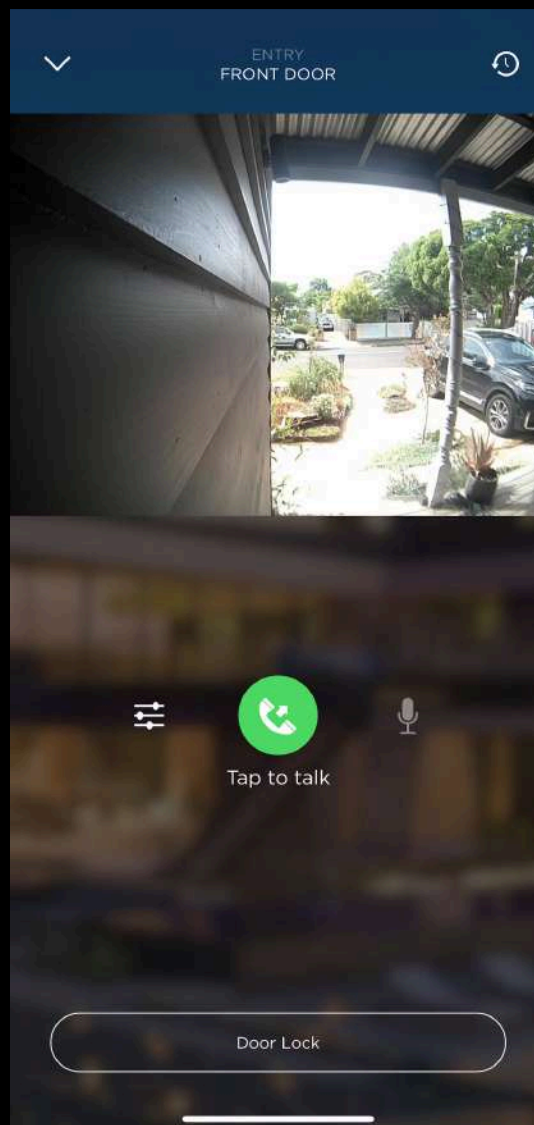

- Access 24/7 livestreams in colour across all cameras of your cctv system.
- Access playback available

ENTRY SERVICES

Full local and remote access via the smart mobile app or a central touch screen panel to;

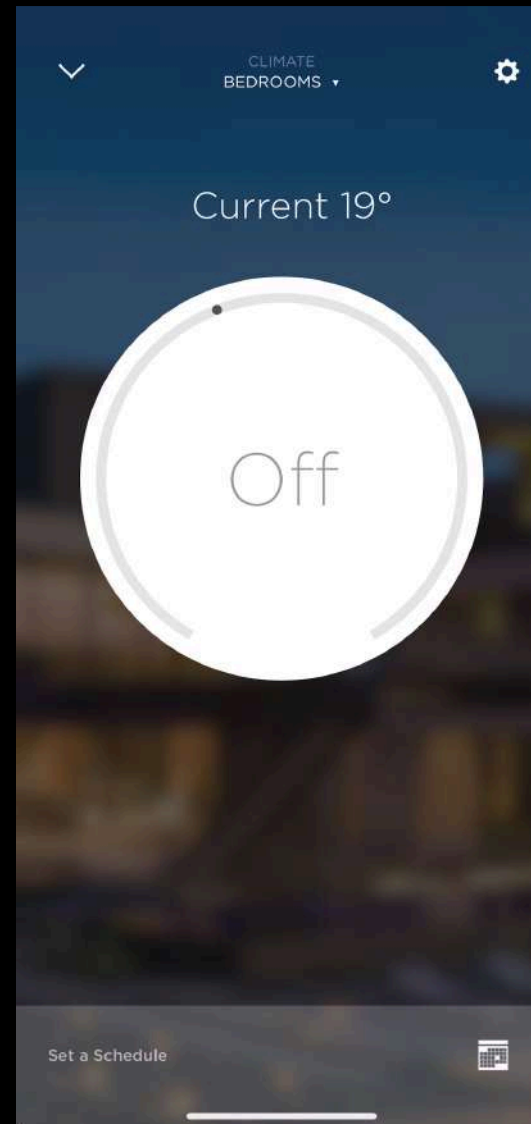

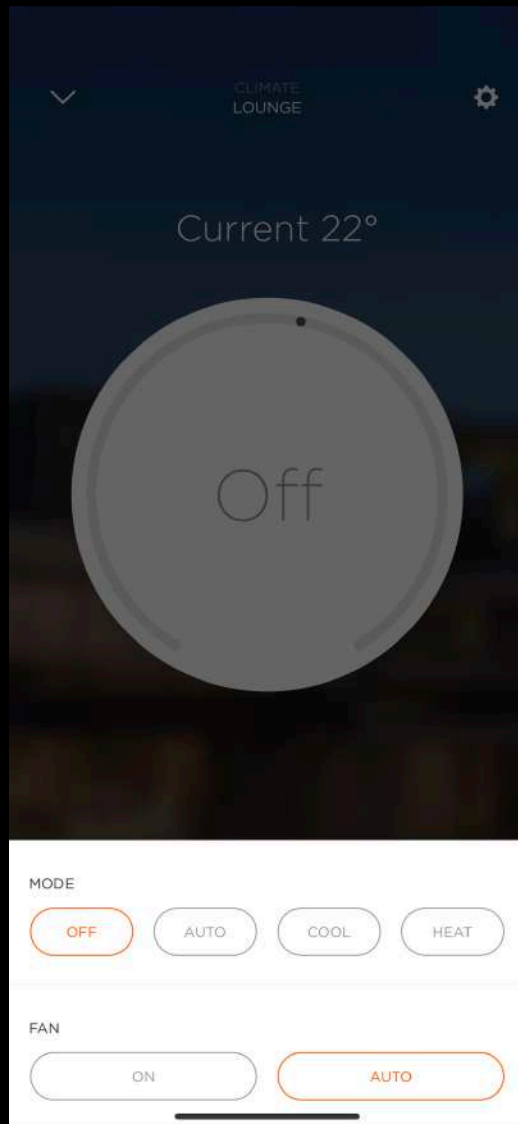

- Automate and control pedestrian gates, sliding gates, front doors, and garage doors for convenience and security
- Enable two-way audio and video communication from anywhere

HEATING & COOLING

Full local and remote access via the smart mobile app or a central touch screen panel to;

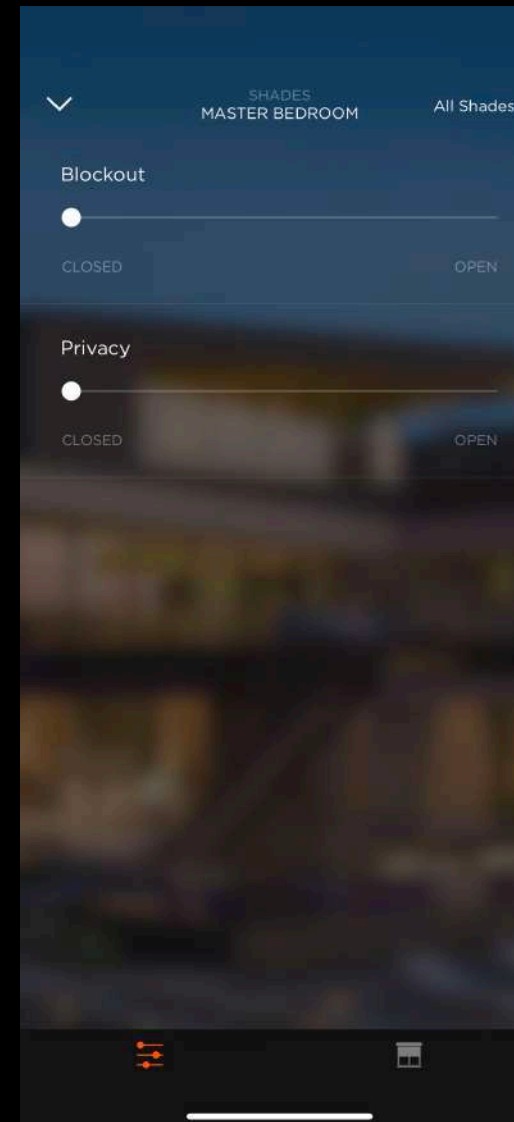

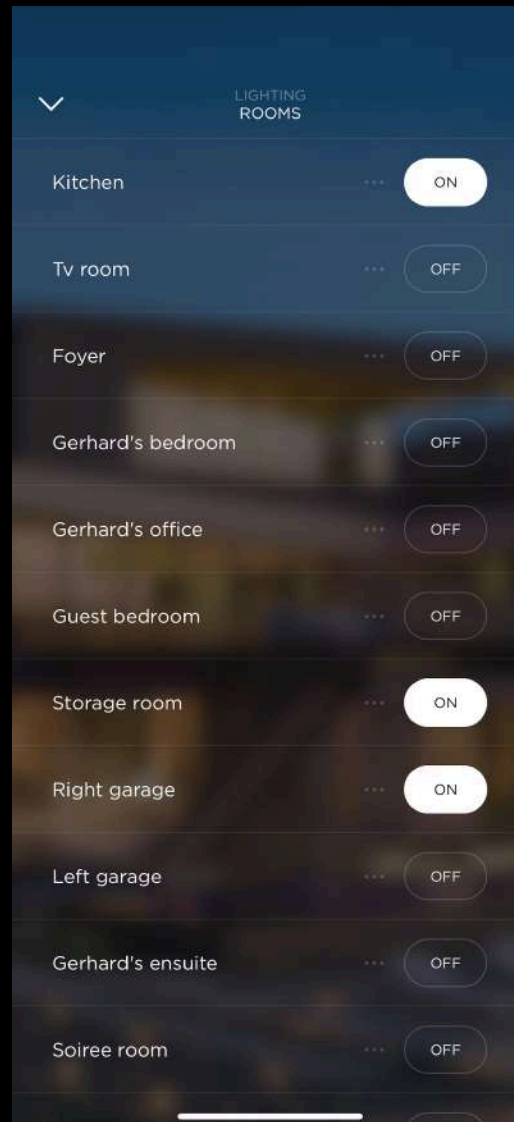

Manage temperature settings and establish distinct zones

LIGHTS & BLINDS CONTROL

Full local and remote access via the smart mobile app or a central touch screen panel to;

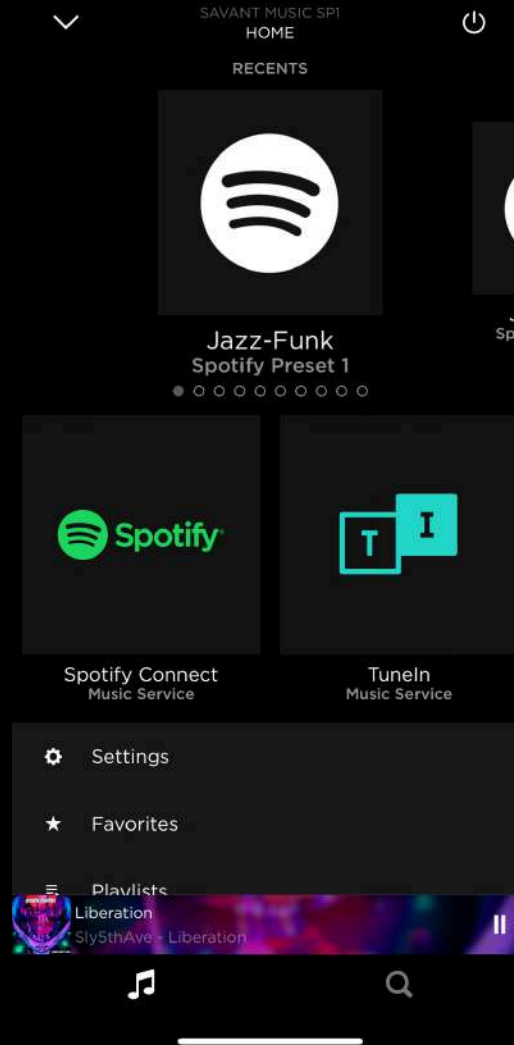

Illuminate both outdoor garden areas and internal living spaces with comprehensive zoning for all lighting systems.

MULTI-ROOM AUDIO MUSIC AND ZONE DISTRIBUTION CONTROL

Full local and remote access via the smart mobile app or a central touch screen panel to;

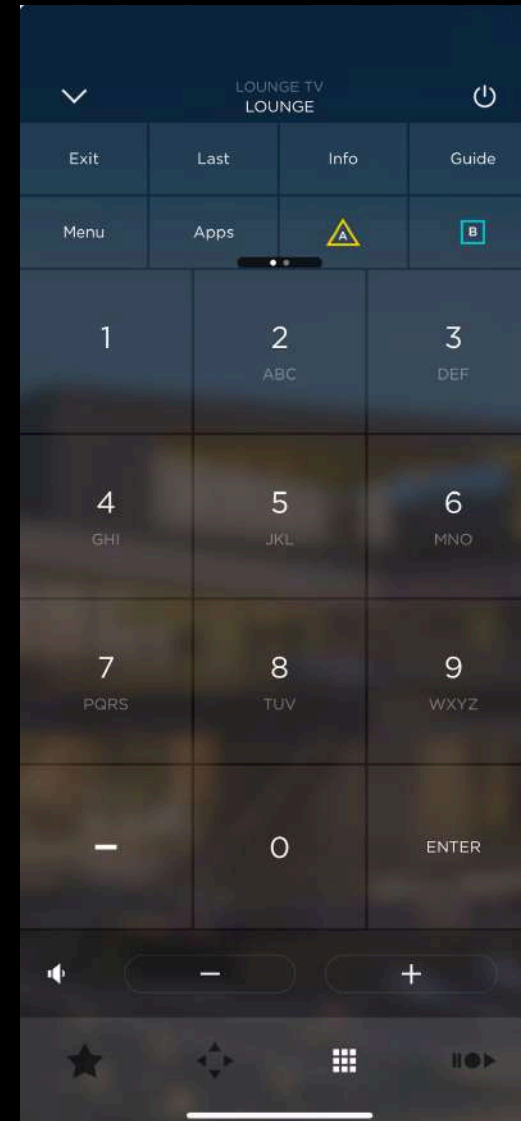

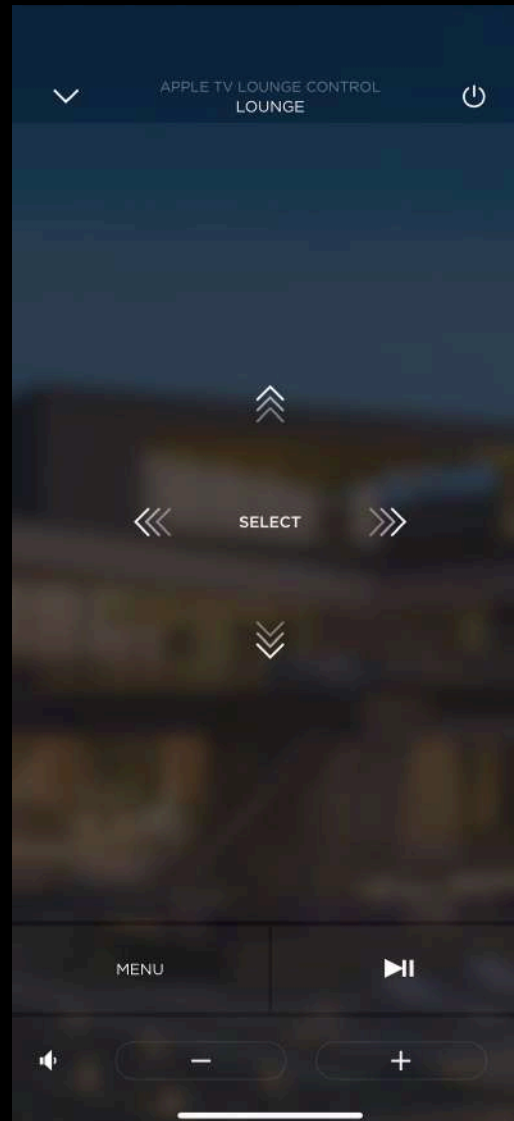

Manage and control audio applications across all zones within the house.

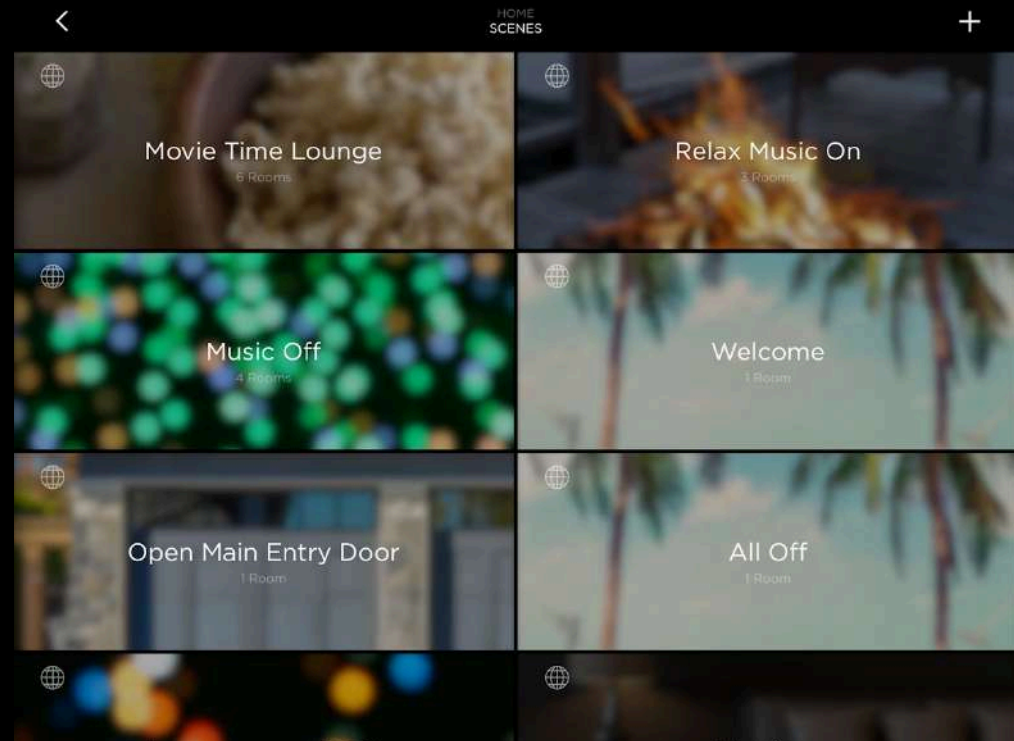

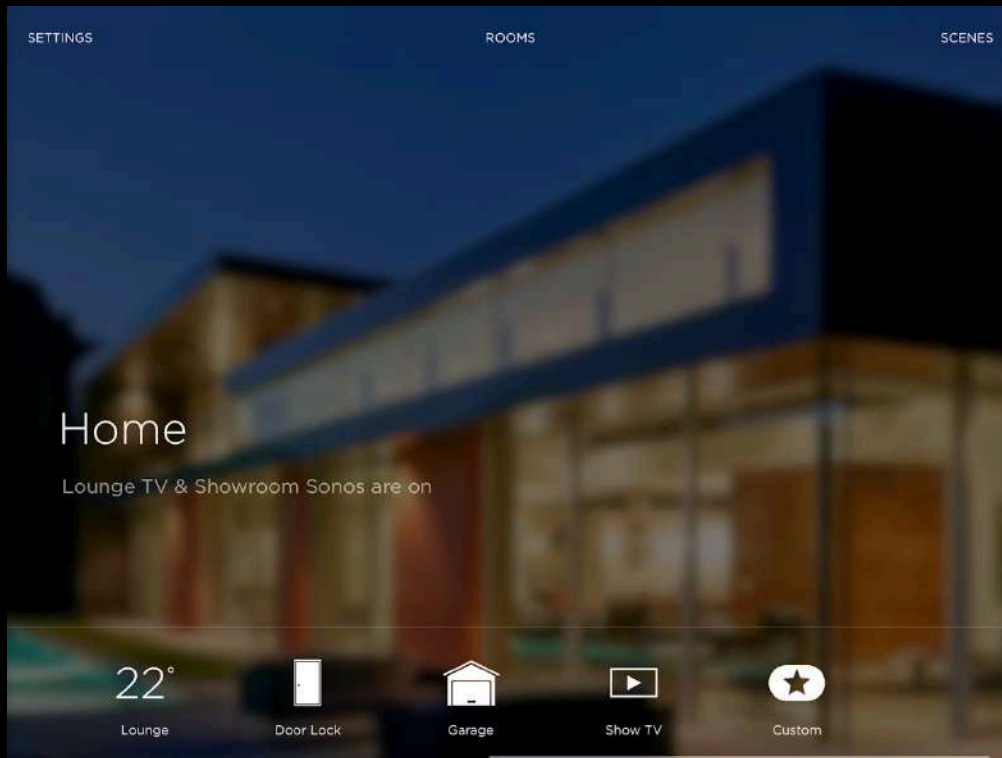

AUDIO VISUAL TVs AND ZONE DISTRIBUTION CONTROL

Full local and remote access via the smart mobile app or a central touch screen panel to;

Manage and control entertainment applications across all zones within the house.

THE ENTIRE ECOSYSTEMS

streamline the
process for you and
your clients.**

DISCOVERY MEETING

To define the scope of the project, understand the client's needs, and recommend solutions aligned with their goals.

PROJECT ALLOWANCE

We provide a project sum allowance for you to include in the specifications.

CLIENT ONBOARD & SYSTEM SELECTION

Once the client has partnered with you for the project, we're excited to arrange a showroom visit. During this visit, the client can handpick the components of the house they'd like to automate, and we'll gladly fine-tune the quote to their preferences for approval.

SIGNING OF TENDER

When the client agrees to the project and on completion Canny will provide a partner rebate.

*Subject to T&C's

OUR 6-STEP PROCESS WITH YOUR CLIENT

Step 1

SHOWROOM VISIT

Here you will experience and choose the systems you need based on your requirements.

Step 2

QUOTATION

We will prepare the quote for you to review and make changes if required.

Step 3

APPROVAL

After the quote is approved, we will create the design drawings and documentation ready for installation and delivery.

Step 4

INSTALL

We will liaise with the builder and contractors to undertake the pre wiring as required.

Step 5

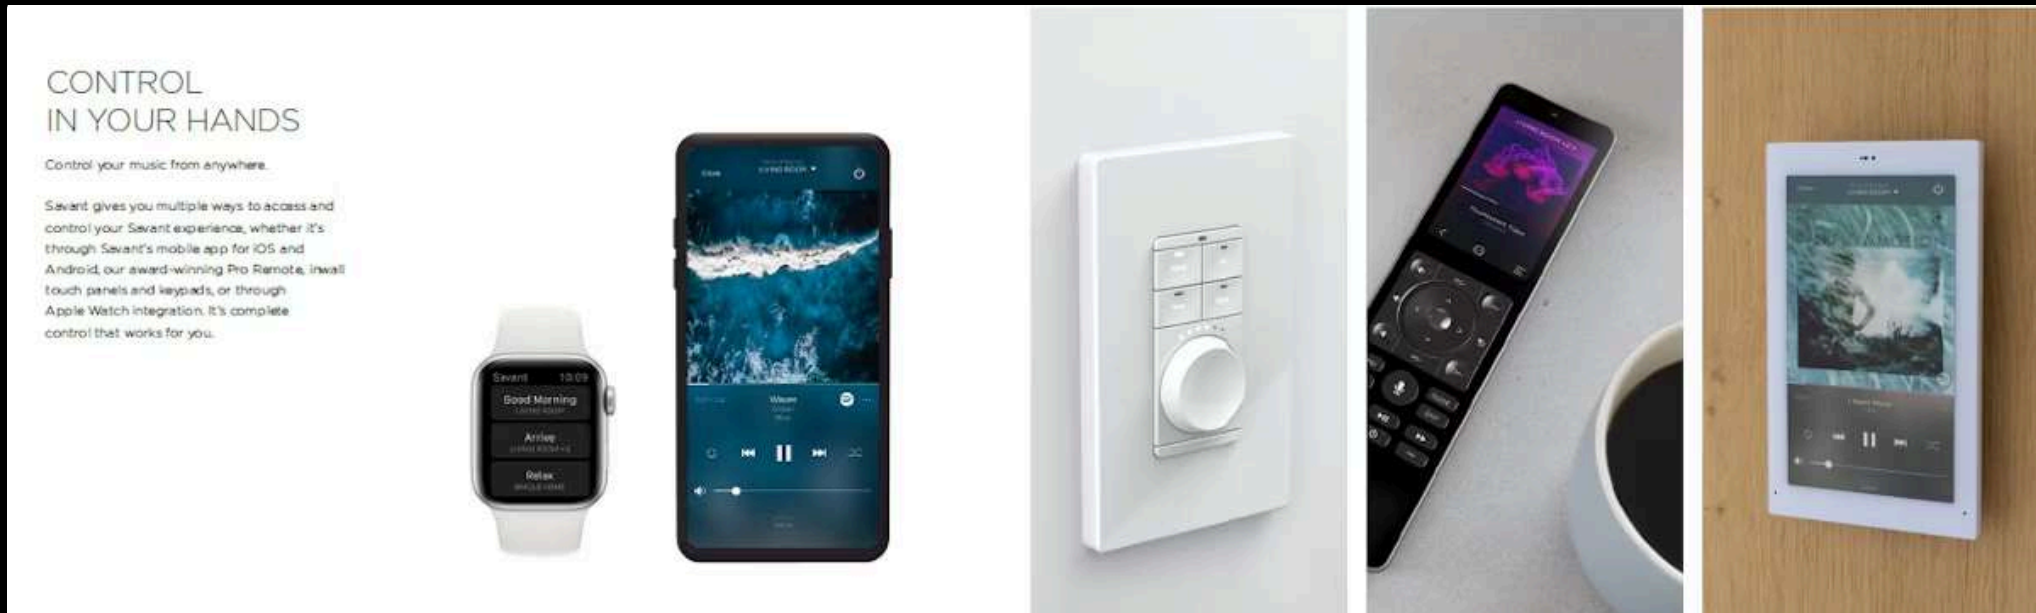

COMPLETION

When the project is completed we, will fit off, configure and hand over your smart home.

Step 6

MAINTAIN

Every 12 months, we will get in touch with you to schedule a visit for us to do our health check, updates and maintenance of your system.
